PROFILE

Cybersecurity & Systems Analyst in training with a strong foundation in computer architecture and cybersecurity, gaining hands-on experience in Linux and Python scripting, and focused on mastering system security, networking, and real-world technical problem-solving.

PROFESSIONAL EXPERIENCE

Graphic Designer

Self Employed(Freelancer)

03/2020 – Present

Accra, Ghana

As a freelance graphic designer, I specialize in creating professional visual solutions that elevate brand identities. My work involves translating client ideas into modern designs, resulting in enhanced brand communication and market presence. I have successfully delivered projects that not only meet but exceed client expectations, fostering long-term relationships and repeat business.

Intern

Enterprise Insurance

09/2025 – 11/2025

ACCRA, GHANA

During my internship, I gained hands-on experience in IT infrastructure management, hardware diagnostics and repair, enterprise network administration, system troubleshooting and support, cybersecurity policy implementation, incident response and problem-solving, technical documentation and communication, business continuity planning, vendor and third-party risk management, data backup and recovery procedures, network management, technical problem-solving, and enterprise systems administration.

EDUCATION

Basic Education Certificate Examination(BECE)

Nsawam Presbyterian Basic School

08/2019

Nsawam, Ghana

WASSCE

St. Johns Grammar Senior High School

01/2020 – 09/2023

Accra, Ghana

Diploma

Ghana Communication Technology University 🔗

02/2025 – Present

Accra, Ghana

The program provides a strong foundation in information security, covering areas such as network security, cryptography, risk management, and security policies. It equips students with practical and theoretical knowledge to identify threats, respond to incidents, and protect IT systems.

SKILLS

- Critical Thinking
- Graphic Design
- Quick learning and adaptability
- Virtual Meetings set ups with Zoom and Microsoft Teams
- Teamwork and collaboration
- Cyber Threat Analysis
- Python Programming

CERTIFICATES

Python Programming Certificate

Learned the core principles of Python, including data structures, control flow, and functions. The course highlighted practical applications such as automation, basic scripting, and problem-solving techniques.

IT at Workplace

Gained practical skills in using workplace technologies including Zoom, Microsoft Teams, and the Microsoft Office Suite. The program enhanced digital communication, collaboration, and productivity skills essential for modern professional environments

Python Programming and AI

Completed training in Python Programming and Artificial Intelligence, gaining hands-on experience in writing efficient code, automating tasks, and developing intelligent systems. Acquired practical skills in problem-solving, data manipulation, and implementing AI models for real-world applications.

PROJECTS

Portfolio site

11/2025 – 12/2025

A portfolio website

A portfolio site that showcases my first web design and development project, built using only HTML and CSS to highlight my skills and work.

Web Scraper

06/2025 – 08/2025

Announcement bot for GCTU

The GCTU News Bot is an automated Telegram bot that serves as a bridge between the Ghana Communication Technology University's official website and its community members. The system continuously monitors the university's announcement page, automatically scraping and extracting news content using web scraping techniques, then intelligently formats and delivers this information to users through an interactive Telegram interface. The bot features smart filtering capabilities, subscription management for daily news digests, and persistent data storage to maintain user preferences, essentially creating a real-time news distribution system that keeps the GCTU community informed about university updates, academic announcements, events, and important notices without requiring users to manually check the website.
